Christina Wu

Software Engineer | christina.wu.dev@gmail.com | linkedin.com/in/christina-wu1 | github.com/christinaawuu

Education

University of Southern California Aug. 2021 - May 2025
Bachelor of Science in Computer Science Games *Los Angeles, CA*
Awards: Dean's List, QuestBridge Finalist, Grace Hopper Conference Scholarship, Viterbi Fall Lead Scholarship
Courses: Software Development (Java), Algorithms, Data Structures (C++), AI (Python), Gameplay Programming

Technical Skills

Languages: C++, C#, Python, Java, JavaScript, Swift, SQL, HTML/CSS
Frameworks/Libraries: Unity, Unreal Engine, React, Firebase, AWS, React.JS
Tools: Git, XCode, Docker, Jira, ClickUp, VS Code, Eclipse, Maya, Figma, AutoCAD, Debugging Tools

Experience

Junior Game Engineer Intern June 2026 - Oct. 2026
Paramount Skydance Games *Manhattan, NY*
- Built core gameplay systems adding extensible functionality, creating legacy architecture for future Skydance titles
- Partnered with designers to define technical specifications, delivering a debug menu operating independently
- Collaborated with **10+** engineers across **2-week Agile sprints** and biweekly standups, communicating task status
- Balanced scope, quality, and pace by consolidating **5** legacy functions into **2** during specification review
- Eliminated **3** recurring AI spawn bugs by rebuilding despawn-radius and force-despawn source code logic

Associate Producer Aug. 2024 - May 2025
Unchained *Los Angeles, CA*
- Acted as technical liaison between a **30+ person** engineering team and **8 cross-functional** groups, translating requirements into actionable tickets and maintaining sprint documentation to support continuous delivery
- Ran **10+ engineering/QA sync meetings**, converting bug reports and feedback into prioritized backlog items, reducing miscommunication between design intent and implementation
- Identified and triaged production risks and technical dependencies across sprints, escalating blockers to engineering leads to keep release schedules on track

Software Engineer Intern Mar. 2023 - May 2025
Cathartic Health *Los Angeles, CA*
- Designed, developed, tested, and debugged responsive web application features using **React, HTML, and CSS**, applying software engineering best practices to improve performance and reliability across user platforms
- Debugged frontend and backend systems using dev tools and logs, cutting user-reported bugs 35%

Academic Projects

Dishcovery | *Swift, Firebase Firestore, YouTube API* April 2025 - May 2025
github.com/christinaawuu/Dishcovery
- Built an iOS mobile app integrating **YouTube Data API, UIKit, and SwiftUI** to serve 10+ real-time recipe videos per query, using URLSession to asynchronously fetch and parse JSON with **sub-1.5s load times**
- Applied CI/CD practices and implemented RESTful API logging with Xcode tools; optimized app response time through iterative debugging and performance monitoring

Twist Tile Golf | *C#, Firebase, Unity, Github* Jan 2025 - May 2025
csci-526-spring-2025.github.io/csci-526-final-project-putter-pirates/GoldBuild/
- Engineered gameplay systems incorporating physics-based tile rotation and interactive mechanics (wind, gravity, electricity); collaborated on **12 level designs** for strategic one-shot golf puzzles with increasing complexity
- Analyzed **30+ Firebase** playtest metrics to debug flow bottlenecks and improve puzzle-level UX

Find Your Spot | *Java, HTML, CSS, GitHub, Eclipse* Feb 2024 - May 2024
findyourspot.netlify.app
- Designed and implemented a full-stack website with multithreaded systems and user auth; supported secure transitions for **10+ guest users** into registered accounts using Java and Firebase
- Co-developed UI and backend APIs, enabling **50+ user-generated posts**; optimized guest-to-user conversion flow, increasing sign-ups by 25% through improved UX design
